Orndorf & Faranda Inc. named structural engineers

Orndorf & Faranda, Inc. of Ardmore, PA are the structural engineers for the Upland Square project. Upland Square Shopping Center consists of five buildings comprising over 200,000 SF of new construction in western Montgomery County. For construction efficiency the exterior walls will be built of 12” load-bearing concrete block. In order to accommodate an expansive and highly visible storefront, system steel moment frames will be used to eliminate the need for intrusive bracing. As with most “big box” type construction these buildings will have a roof system comprised of open-web steel bar joists and joist girders.

Orndorf & Faranda, Inc. is a structural engineering and design firm located in the central business District of Ardmore, Pennsylvania , with a branch office in Greenville, Delaware. O & F is an award-winning, client-oriented firm that combines extensive in-depth experience of a larger engineering firm with the personalized service of a small firm.
